

COUGAR★CONTROLS

The Lone Star in Custom Controls

Break Tank Level Control Panel

- Conductivity level control
- Ultrasonic monitoring with digital display
- Dual solenoid fill valve with automatic alternation
- Special Applications: block valve, temperature monitoring, city supply pressure monitoring

Water Heater Sequencer

- Available sequencing based on temperature, flow and heater fault
- Valve position monitoring
- Digital screen with adjustable system set points

Boiler Valve Controller

- Sequencing based on boiler feed back
- Built-in adjustable time delays for inactive boiler flush

Sanitary Sump Pump Panel

- 2 and 3 float configuration
- Ultrasonic continuous level system with back-up float
- Float monitoring system for pump failure

Storm Sump Pump Panel

- 2 and 3 float configuration
- Ultrasonic continuous level system with back-up float
- Float monitoring system for pump failure

Fuel System Panels

- Fuel Oil Handling System Controls
- Fuel Pump Controls
- Fuel Monitoring
- Fuel Tank Gauging
- Fuel System Operational Upgrades
- Fuel Filtration & Maintenance
- Day Tank Monitoring & Control
- Generator/Boiler Interface

Underwriters Laboratories Inc. (UL) has been the trusted independent source for product testing and public safety for more than a century. Reliability and safety are vital to Cougar Controls™ and we are proud to be a UL 508a certified control panel facility.
