

REMOTE FILL STATION

RFS SERIES

TECHNICAL DATA SHEET

Cougar Fuel Systems™ remote fill station is the most complete, comprehensive design on the market today. Our basic package consist of Stainless Steel construction, 5 gallon fuel containment area, NEMA 4 protection, integral piping and complete system status with A/V functions when used in conjunction with our system tank gauging. There are a number of options indicated below and custom configurations are always available. The integral controls package is UL 508 listed and can incorporate multiple tanks and tank selection upon request. Piped units feature Schedule 40 carbon steel pipe, API 607 full port isolation valve with locking handle and integral sight glass, dry break fitting, duct cap and dry break coupler chained to the enclosure.

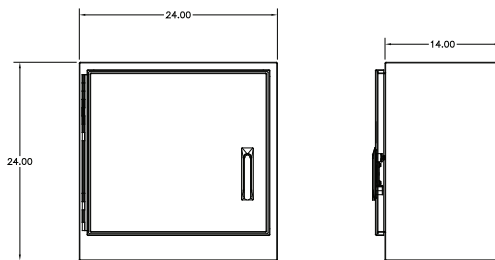

RFS Series
